* The limited partnership record keeping, including the internal rate of return or IRR, is maintained internally by CalSTRS for each limited partnership. The CalSTRS' IRR calculation method may differ from calculation methods used by the General Partner or other Limited Partners. Differences in IRR calculations can be affected by cash flow timing, the account treatment of carried interest, partnership management fees, advisory fees, organization fees, other partnership expenses, sale of distributed stock and valuations. Importantly, there is no industry-standardized method for valuation or reporting, which makes comparisons of these numbers difficult. Additionally, the purchase of secondary interests makes for unique comparison problems due to the specific pricing and timing characteristics of the transaction when contrasted with the Limited Partnership Investment. Until a partnership is liquidated, typically over 10 to 12 years, the IRR is only an interim estimated return. The IRR calculated for partnerships in the first three years of a partnership life are particularly not meaningful. The actual IRR performance of any limited partnership is not known until the final liquidation. *Finally, please note, none of the information contained herein has been reviewed or approved by the General Partners of the Funds.*

* The limited partnership record keeping, including the internal rate of return or IRR, is maintained internally by CalSTRS for each limited partnership. The CalSTRS' IRR calculation method may differ from calculation methods used by the General Partner or other Limited Partners. Differences in IRR calculations can be affected by cash flow timing, the account treatment of carried interest, partnership management fees, advisory fees, organization fees, other partnership expenses, sale of distributed stock and valuations. Importantly, there is no industry-standardized method for valuation or reporting, which makes comparisons of these numbers difficult. Additionally, the purchase of secondary interests makes for unique comparison problems due to the specific pricing and timing characteristics of the transaction when contrasted with the Limited Partnership Investment. Until a partnership is liquidated, typically over 10 to 12 years, the IRR is only an interim estimated return. The IRR calculated for partnerships in the first three years of a partnership life are particularly not meaningful. The actual IRR performance of any limited partnership is not known until the final liquidation. *Finally, please note, none of the information contained herein has been reviewed or approved by the General Partners of the Funds.*

* The limited partnership record keeping, including the internal rate of return or IRR, is maintained internally by CalSTRS for each limited partnership. The CalSTRS' IRR calculation method may differ from calculation methods used by the General Partner or other Limited Partners. Differences in IRR calculations can be affected by cash flow timing, the account treatment of carried interest, partnership management fees, advisory fees, organization fees, other partnership expenses, sale of distributed stock and valuations. Importantly, there is no industry-standardized method for valuation or reporting, which makes comparisons of these numbers difficult. Additionally, the purchase of secondary interests makes for unique comparison problems due to the specific pricing and timing characteristics of the transaction when contrasted with the Limited Partnership Investment. Until a partnership is liquidated, typically over 10 to 12 years, the IRR is only an interim estimated return. The IRR calculated for partnerships in the first three years of a partnership life are particularly not meaningful. The actual IRR performance of any limited partnership is not known until the final liquidation. *Finally, please note, none of the information contained herein has been reviewed or approved by the General Partners of the Funds.*

* The limited partnership record keeping, including the internal rate of return or IRR, is maintained internally by CalSTRS for each limited partnership. The CalSTRS' IRR calculation method may differ from calculation methods used by the General Partner or other Limited Partners. Differences in IRR calculations can be affected by cash flow timing, the account treatment of carried interest, partnership management fees, advisory fees, organization fees, other partnership expenses, sale of distributed stock and valuations. Importantly, there is no industry-standardized method for valuation or reporting, which makes comparisons of these numbers difficult. Additionally, the purchase of secondary interests makes for unique comparison problems due to the specific pricing and timing characteristics of the transaction when contrasted with the Limited Partnership Investment. Until a partnership is liquidated, typically over 10 to 12 years, the IRR is only an interim estimated return. The IRR calculated for partnerships in the first three years of a partnership life are particularly not meaningful. The actual IRR performance of any limited partnership is not known until the final liquidation. Finally, please note, none of the information contained herein has been reviewed or approved by the General Partners of the Funds.

* The limited partnership record keeping, including the internal rate of return or IRR, is maintained internally by CalSTRS for each limited partnership. The CalSTRS' IRR calculation method may differ from calculation methods used by the General Partner or other Limited Partners. Differences in IRR calculations can be affected by cash flow timing, the account treatment of carried interest, partnership management fees, advisory fees, organization fees, other partnership expenses, sale of distributed stock and valuations. Importantly, there is no industry-standardized method for valuation or reporting, which makes comparisons of these numbers difficult. Additionally, the purchase of secondary interests makes for unique comparison problems due to the specific pricing and timing characteristics of the transaction when contrasted with the Limited Partnership Investment. Until a partnership is liquidated, typically over 10 to 12 years, the IRR is only an interim estimated return. The IRR calculated for partnerships in the first three years of a partnership life are particularly not meaningful. The actual IRR performance of any limited partnership is not known until the final liquidation. *Finally, please note, none of the information contained herein has been reviewed or approved by the General Partners of the Funds.*
